Syngenta Australia Pty Ltd exercises all due care in providing information, advice and assistance, including information in its brochures and catalogues, and in testing the varieties for the indicated disease races and pathotype tolerances. All information provided by Syngenta Australia Pty Ltd is intended as a general guide only and must be considered in the context of local circumstances, including geographical location, climate, soil type, soil conditions, cultural and management practices, and other growth and development factors. Any and all figures stated are comparative information, not absolute values. Local conditions may include unknown disease races or pathotypes for which the varieties have not been tested and to which they may be susceptible. Accordingly, the advice and varieties are provided without liability or responsibility (including for negligence) other than liability which cannot be lawfully excluded. Syngenta Australia Pty Ltd recommends that in all cases a small scale trial production is undertaken in order to test local conditions and circumstances which may affect the crop.
